OFFICE ACTION

1. This application has been assigned to Technology Center 1700, Art Unit 1723 and the following will apply for this application:

a. Please direct all written correspondence with the correct application serial number for this application to Art Unit 1723.

b. Telephone inquiries regarding this application should be directed to the Technology Center 1700 receptionist at ☎(703) 308-0651 or to the Examiner at ☎(703) 308-0112. Official facsimile correspondence filed before a final office action should be transmitted to ☎(703) 872-9310. Official facsimile correspondence which responds to a final office action should be transmitted to ☎(703) 872-9311.

c. Inquiries regarding application status, matching responses with applications, patent term questions, locating and retrieval of applications, incomplete office actions, requests for copies of office actions and/or references, requests to remail office actions, small/large entity status, or other administrative inquiries should be directed to the **Technology Center 1700 Customer Service Center** at ☎(703) 306-5665.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Art Unit: 1723

- I. Claims 1-39, drawn to a filtering apparatus, classified in class 494, subclass 24.
- II. Claims 40-42, drawn to a method of filtering, classified in class 494, subclass 37.

3. The inventions are distinct, each from the other because of the following reasons:

4. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process such as a process which does not rotate the filter via a nozzle and turbine arrangement, e.g., the filter could be driven by a motor or transmission means such as a gear train or belt drive.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because the search required for each Group is a divergent search, restriction for examination purposes as indicated is proper.

6. Upon election of Group II, claims 37-39 will be examined with the method claims 40-42 of Group II. However, upon election of Group I (apparatus), the following

Art Unit: 1723

election of species requirement will apply: This application contains claims directed to the following patentably distinct species of the container of the claimed invention (note the description of these Figures in the specification states that the following grouping of Figures are multiple embodiments of the invention):

Species A: Figure 1;

Species B: Figures 2-3;

Species C: Figure 4;

Species D: Figure 5;

Species E: Figure 6;

Species F: Figure 7;

Species G: Figures 14-16;

Species H: Figure 17;

Species I: Figure 18;

Species J: Figure 19;

Species K: Figure 20;

Species L: Figure 21;

Species M: Figure 22;

Species N: Figure 23;

Species O: Figure 24;

Art Unit: 1723

Species P: Figures 25-26;

Species Q: Figure 27;

Species R: Figure 28;

Species S: Figure 29;

Species T: Figure 34; and

Species U: Figure 37.

7. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 appears to be generic to each of the species.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1723

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Charles Cooley whose telephone number is ☎ (703) 308-0112.

Art Unit: 1723

11. Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1700 receptionist whose telephone number is (703) 308-0651.
